

Appln No. 10/760,249  
Amdt. Dated May 18, 2006  
Response to Office Action of April 4, 2006

2

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Cancelled)

✓ 2. (Currently Amended) A printer cartridge according to claim 15, further including a body in which the printing fluid storage is located and to which the pagewidth printhead and the refill port are attached.

3. - 4. (Cancelled)

5. (Newly Presented) A printer cartridge for an inkjet printer, the printer cartridge comprising:

A pagewidth printhead with an array of nozzles for ejecting different printing fluids onto a media substrate, each of the nozzles being dedicated to one of the different printing only;

A plurality of printing fluid reservoirs for storing each of the different printing fluids separately, each of the plurality of printing fluid reservoirs being in fluid communication with the nozzles of the array that correspond to its printing fluid; and,

A refill port with a plurality of inlets, each of the inlets being in fluid communication with one of the printing fluid reservoirs only; such that,

Each of the printing fluid reservoirs can be individually refilled to replace printing fluid ejected by the pagewidth printhead.

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1. (Currently amended) A printer cartridge for an inkjet printer including:  
printing fluid storage for storing one or more printing fluids;  
a pagewidth printhead in fluid communication with the printing fluid storage;  
and  
a refill port in fluid communication with the printing fluid storage for refilling the printing fluid storage to replace printing fluid ejected by the pagewidth printhead.
2. (Original) A printer cartridge according to claim 1, further including a body in which the printing fluid storage is located and to which the pagewidth printhead and the refill port are attached.
3. (Original) A printer cartridge according to claim 1 or claim 2, wherein the printing fluid storage includes separate printing fluid storage reservoirs for each of the one or more printing fluids.
4. (Original) A printer cartridge according to claim 3, wherein the refill port includes one or more inlets corresponding to, and in communication with, each of the separate printing fluid storage reservoirs.
